四川首座储气库开始注气

2021年3月10日,西南油气田公司牟9井开始注气,天然气瞬时流量为 $3 \times 10^4 \text{ m}^3/\text{d}$,标志着四川首座储气库牟家坪储气库开始注气,为打造川南地区天然气“夏储冬用”新模式按下快进键。

根据规划,西南油气田公司将在四川省宜宾市境内建设四川首个地下储气库群,用于成都及川西、川南天然气调峰。这个储气库群由牟家坪、老翁场两个储气库组成,设计库容 $59 \times 10^8 \text{ m}^3$,工作气量 $30 \times 10^8 \text{ m}^3$,计划建设集注站2座、注采井场10座、新钻注采井39口,建成后日注气能力 $2\,000 \times 10^4 \text{ m}^3$ 、日采气能力 $3\,900 \times 10^4 \text{ m}^3$ 。

根据建库整体规划,两座储气库将于2022年完成先导性试验建设及试注气,2023年完成施工建设,2025年投产,2030年全面建成。
